Global Solutions. Local Expertise.

Sedgwick is a leading global provider of loss adjusting services and claims management solutions. With over 50 years of experience and more than 900 offices, our 31,000+ colleagues located in 80 countries, we offer a unique combination of innovation and technical capabilities in a wide range of disciplines.

LEADER IN CLAIMS MANAGEMENT AND LOSS ADJUSTING SERVICES WORLDWIDE

We strive to cut down on the complexity of processes and offer a service with a unique combination of stability, innovation and technical capacity in a wide range of business lines.

DIGITAL STRATEGY

The ability to employ technological tools in today's disasters is a vital component; from being able to use drones to get an early view of the most inaccessible damages, to using live video-call tools to shorten timescales or having online accessibility to claims data to help our clients make faster and more accurate decisions. Without doubt, the intelligent

use of new technologies becomes a powerful tool in the hands of our experts.

RESPONSE CAPACITY

Sedgwick is one of the biggest suppliers on a global scale of loss adjusting and claims management solutions. That is why, with the help of local experts, we can respond quickly to the needs of our customers.

WE PROVIDE SERVICE TO THE INSURANCE MARKET:

- Insurance companies
- Reinsurers

All claims are centrally managed by an account supervisor giving our clients a single point of contact.

In addition to being responsible for the assignment and co-ordination of the specialists required for each claim, the account supervisor makes sure that the client's interests are taken into account locally in each country.

Digital strategy

At Sedgwick we have opted for the development of solutions adapted to the claims field; effective tools to simplify processes, reduce management costs, save on compensation requested and effective fraud detection.

We're determined to lead the field in developing digital solutions. What drives our digital strategy is the belief that technology should satisfy one or more of the following criteria:

Improved customer experience

Personalized, intuitive, effective, fast, clear

Reduced cost on compensation and processing

Self-service, improved communication

Reduced timescales

Effective protocols, adapted tools, loss adjusting report generators

A better global insight

Business interruption, digital data, analytical capability

This includes:

- Customer portal access 24/7/365
- Loss adjustment video tool
- Drones: access to inaccessible places
- Cell phone connectivity for loss adjusters
- Generated online reports: business interruption
- Own management system
